**EVOLVE**  
*Insurance solutions for  
developing international companies*

## ACE Evolve

### An Introduction

As a successful company, you have the entrepreneurial drive to grow your operations internationally. Taking that first step into a new country can be challenging and there are many issues to consider, not least how your non-domestic operations are protected.

Will your domestic insurer have the expertise and servicing infrastructure to understand your developing insurance requirements?

'ACE Evolve' is a coordinated insurance solution for developing international companies which gives you access to our global knowledge, products and services on a local basis.

Cover is available across the European Union on a 'Freedom of Services' basis or 'admitted' basis, or globally on an 'admitted' basis - where policies are issued that meet the requirements of local legislation and you have direct access to local contacts and expertise.

When it comes to trading internationally it's not simply the cover that counts but the knowledge and expertise of your insurer.

### A Comprehensive Service Proposition

ACE Evolve gives you access to our global servicing network. We have local experts on the ground and local facilities for policy issuance and proof of cover, claims handling, and risk management services. This service capability and knowledge is available through two key tools:

- MAX - Our 'Multinational Account eXchange' puts control and structure around communications across our global network, specifically the issuing and servicing of local policies. These protocols enable us to provide consistent standards of service with immediate information and control available should a local problem occur.

- AIM - ACE Interactive Map - a tool that overlays your international operations with our global servicing network to provide information on local insurance practice and regulatory requirements.

Importantly, we work with your insurance advisors and support them, as required, in servicing your non-domestic operations.

This coordinated approach ensures you get the widest cover available cost effectively and efficiently.

With ACE Evolve, you can be confident that as you take your first steps towards trading internationally your insurance advisor and your insurance company have the necessary skills to provide the support and assistance you need.

### Financial Stability

Conducting business with the ACE European Group means you benefit from an insurance company with one of the strongest and most stable financial ratings in the industry. Throughout the recent turbulence in the insurance market the ACE European Group has retained its strong financial ratings.

ACE European Group Limited is rated A+ (strong) by Standard & Poor's and A+ (superior) by A.M. Best.

### Global Reach and Local Presence

From a chain of retail outlets in the Ile de France to wine growers in Tuscany; from telecommunications companies in Spain to chemical recycling plants in Germany; from the personal assets of company directors to a fleet of container ships, ACE Europe offers insurance solutions to a diverse array of clients.

We have successfully blended the knowledge of our local markets with the worldwide perspective of a global organisation.

The ACE group of companies is one of the world's leading providers of insurance and reinsurance. We operate in more than 50 countries across the globe and are licensed to transact business in over 140. Our global reach means we have a wealth of expertise and first-hand experience of the issues affecting key economic markets.

### Underwriting Expertise

ACE is a leading provider of property and liability insurance throughout Europe, with dedicated underwriters based in all the major European markets, and is renowned for its flexible and committed approach in providing insurance solutions across all product lines.

Success for ACE Europe can be attributed to many factors; most notably our depth of underwriting expertise, tailored underwriting and the autonomy each regional office retains over its underwriting decisions. We are underwriters first and foremost, and we use our expertise – the business of taking risk – to capitalise on opportunities for our brokers and their clients.
